## **Avalara to Provide Sales Tax Rate and Boundary Information Services**

LINCOLN – The Nebraska Department of Revenue (Department) is pleased to announce that Avalara, a provider of sales tax automation services, is now providing Nebraska rates and boundary services, including the rates and boundaries database and the online sales tax rate finder.

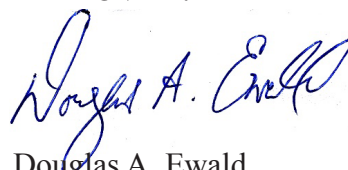

Avalara uses the accuracy of geographic technology analysis to determine Nebraska's city and county boundaries.

Avalara also makes available a new mobile app called TaxNE. This mobile app provides the same accurate sales tax rate lookup for any location in Nebraska. An added feature allows the use of the GPS function on a smartphone to find the phone's actual location and corresponding sales tax rate.

Visit the Department's website at [www.revenue.ne.gov](http://www.revenue.ne.gov) for more information, including links for free downloads from the Apple and Google Play mobile app stores.
